### About Me

I am passionate about computers I have studied them my whole life. Fundamentals like hardware, software and programming. I am qualified and very knowledgeable with all aspects of computing. During my spare time, I freelance mainly in web design and general computing and doing so I have been very successful. I have a passion for data security and reverse engineering. I love building computers and robots as well as flying drones; I also love making video games in my spare time. Also Proudly & Voluntary I run a code club where I go to a local primary school and teach the children how to code and be creative.
